Homeowner Maintenance Guide

.5–1.5 inches	1 inch per week total	Preventative Fungicide & Insecticide

Spring

- Keep Celebration Bermudagrass mowed between .5 and 1.5 inches.

- Apply pre-emergent herbicide. This will cut down on summer weeds.

- If you have experienced insect issues in the past, treat with broad-spectrum insecticide. If you use a granular insecticide, water the lawn immediately after application to help soil absorption.

- Don't overwater. In the active growing season, Celebration needs about one inch of water a week from natural rainfall or irrigation. Too much water can cause fungus.

- Apply fungicide if needed. If you have had a fungus or disease in your Celebration in the past or have quite a bit of shade in the yard, you should apply a systemic fungicide to prevent future outbreaks.

- Fertilize your lawn: Lawnifi Spring Fertilizer Box.

Summer

- When mowing, never remove more than 1/3 of the leaf blade at a time. If you need to cut more than 1/3, consider multiple cuts over three to five days.

- Do not overwater the grass. Celebration only needs about one inch of water weekly. Water for longer periods of time, less frequently, and in the early morning hours. Take rainfall into consideration.

- Fertilize your lawn: Lawnifi Summer Fertilizer Box.

Fall

- Apply fungicide. This will help the grass enter colder months in healthier condition. If you have had fungus before, you may need multiple applications in affected areas.

- Treat with broad-spectrum insecticide. If you use a granular variety, water the lawn immediately after application to help soil absorption.

- Mow less in cooler fall months. Leave your Celebration lawn slightly higher than normal to encourage deeper root growth for winter. Adjust mower settings up one notch.

- Water less. As temperatures drop grasses don't need as much irrigation. Too much watering can lead to lawn disease.

- If you haven't had past problems with winter weeds, you can forgo herbicide in the fall. If you do get winter weeds, apply a pre-emergent herbicide for prevention.

- Fertilize your lawn: Lawnifi Fall Fertilizer Box.
