WHY BIMINI®?

Bermudagrass is a warm season grass with exceptional heat and drought tolerance. BIMINI® is a fine-bladed grass with a vigorous growth rate, deep roots and dense rhizomes. Its resilience to heavy foot traffic, with excellent shear strength makes it a preferred grass for sports fields.

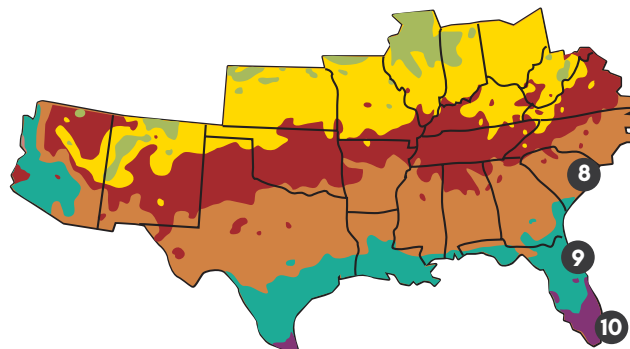

UsesAthletic Fields, Golf, Home
Color Deep Green
Blade Width..... 1.5mm
Feel Soft
Spring Greenup Very Good

PERFORMANCE

PLANTING ZONE MAP

BIMINI®'s cold tolerance allows it to grow in multiple planting zones.

Zone	Avg. Annual Low
Zone 8	20°F - 10°F
Zone 9	30°F - 20°F
Zone 10	40°F - 30°F

CUSTOMER TESTIMONIALS:

"BIMINI® is the last grass to show any signs of cold weather and the first one that's back to 100%."

-Mike Hendrix, Imperial Golf Club Inc., Naples FL

"Knowing I didn't have to push high nutrient inputs to get optimum density and color was a deciding factor for us to go with Bimini on our course."

-Tyler Casey, West Bay Golf Club, Estero FL

VERSATILITY

SPORTS:

Wear Tolerance

Rhizomes in the root system allow BIMINI® to quickly recover from divots and damage. BIMINI®'s wear tolerance extends to high traffic areas, where golfers and carts are often going across the grass. This benefit also extends to multi-player sports fields.

Consistency

You can count on BIMINI® to hold its beautiful color and texture across a 70-acre golf course. From the first hole to the last, BIMINI® remains the same. BIMINI® is slow to go dormant in the winter and greens up early in the spring, so you'll have more days of beautiful green grass.

Density & Playability

BIMINI®'s density provides great support for a golf ball to rest on top of, making it easier for golfers to perform well. Additionally, the soft nature helps to prevent injury.

RESIDENTIAL:

Traffic Tolerance

BIMINI®'s deep root system allows BIMINI® to withstand and recover from high traffic such as; children playing, family and friends relaxing, animals, and vehicles.

Visual Appearance

You'll be the envy of the neighborhood with BIMINI®. BIMINI® retains its green color better than other grasses. BIMINI® is slow to go dormant in the winter and greens up early in the spring, so you'll have more days with a beautiful green front porch view.

Density

BIMINI®'s soft nature and density is a dream to enjoy barefoot.
